Summer Open And Reproducible Research (SOAR²) Camp

Sep 21-23, 2026, Loma Pelona Center, UCSB

Updates

- Application decisions have been released. Thank you to everyone who applied, and congratulations to our 2026 SOAR² participants—we look forward to learning together in September.
 - We are pleased to announce **Dr. James Fraser**, Professor and Chair of BioEngineering at UCSF as our keynote speaker!
 - Additional program information will be posted here throughout the summer.
- 📌 TIP: Bookmark this page for easy access.

The Summer Open And Reproducible Research (SOAR²) Camp is a three-day, hands-on program designed for UCSB undergraduate students who want to navigate research with confidence.

Program Highlights

Participants will:

- Gain practical skills for working with and organizing data
- Learn how to document research clearly and reproducibly

- Understand how research projects take shape—from start to finish
- Explore what it means to do research openly and responsibly
- Build confidence communicating your research
- Consider the opportunities and limitations of using generative AI in research
- Leave with a clear plan for your next steps in research

See the [SESSIONS](#) tab for more information about the program, including the tentative schedule and module descriptions.

What to expect?

SOAR² is highly interactive. Participants will engage in:

- Interactive workshops and hands-on activities
- Small-group discussions and collaborative exercises
- Visits to campus research facilities
- A keynote talk from a researcher doing open and reproducible science

Sessions are led by [instructors and facilitators](#) from different disciplines who will provide perspectives across different fields.

SOAR² is free to attend, and meals are provided. A digital badge and a certificate will be issued upon completion.

Who participates?

SOAR² will bring together UCSB undergraduate students from across disciplines (from Biological & Life Sciences to Humanities & Fine Arts). Some are already involved in research projects, while others are exploring research opportunities for the first time. We can't wait to get started!

Program timeline

Application window: May 11 - Jun 3, 2026

Decisions released: by mid Jun, 2026

Program details and logistics: throughout the Summer 2026

SOAR² Camp: Sep 21 - 23, 2026 (between Fall move-in weekend and the start of classes)
